EDUCATION

Jaypee Institute of Information Technology **Noida, Uttar Pradesh**

Bachelor in Technology, Computer Science and Engineering | CGPA: 7.6 /10 *July 2027*

SUMMARY

Software engineering student with hands-on experience in Python and JavaScript, building full-stack web apps and AI-driven systems. Skilled in FastAPI, Next.js, React, MongoDB, MySQL, and multi-agent AI architectures, with experience deploying scalable real-time platforms and backend APIs.

PROJECTS

ChatterlyAI – Real-Time Multi-Agent AI Collaboration Platform– (Python + Full stack + GenAI) - Website link

Full-Stack / AI | Python, FastAPI, Next.js, WebSockets

- Designed and deployed a multi-agent AI platform using FastAPI, LangChain, and CrewAI to coordinate specialized agents for reasoning, coding, and writing, onboarding 50+ users in the first week with strong positive feedback from freelancers and developers.
- Built a real-time collaborative AI chat system using WebSockets with shared context, live message synchronization, and streaming responses, ensuring low-latency communication and consistent message edit and delete behavior during concurrent usage.
- Developed and deployed a scalable full-stack architecture with a Next.js frontend and decoupled Python services on Vercel and Render, implementing OAuth authentication and maintaining stable performance while coordinating multiple backend services.

Jaypee Learning Hub – Academic Resource Management Platform (Full-Stack) - Website Link

Web Development

- Built and maintained a production academic resource platform from scratch using vanilla HTML, CSS, and JavaScript with a PHP–MySQL backend, currently serving 1000+ active users and managing 1200+ course resources.
- Architected the entire data model and backend logic independently, later refactoring database schemas and optimizing SQL queries to improve load times, data consistency, and overall system responsiveness.
- Iteratively improved performance and usability through frontend and backend updates, strengthening fundamentals in raw JavaScript, CSS, and backend data handling without reliance on frameworks.

WORK EXPERIENCE

DRID Internship – (Project Intern) - GitHub Repo Link **Remote**

E-Sports and Stress Management for Differently-Abled People *June 2024*

- Identified the need for an engaging and accessible digital tool to support stress management for differently-abled users, and engineered a Python-based educational game from scratch using Pygame to address cognitive engagement and relaxation.
- Created and implemented accessibility-first UI features such as high-contrast color schemes, enlarged text, and simplified control mappings, improving usability for users with motor skill and visual challenges.
- Worked closely with academic mentors to iteratively test, debug, and optimize game mechanics and performance, resulting in a stable, smooth-running application suitable for use across multiple systems.
- Collaborated under the mentorship of Prof. Manish Kumar Thakur (assoc. HOD) and Dr. Suma Dawn to refine game mechanics.

SKILLS

Programming Languages: Python , C/C++ , JavaScript , PHP

Web & Backend Technologies: HTML, CSS, Node.js, React , Express.js, MongoDB, MySQL, Next.js

Tools and Platforms: Git, GitHub, Docker, DockerHub, XAMPP, CrewAI, Ollama, Hugging Face

Machine Learning & AI: NumPy, Pandas, Scikit-learn, Matplotlib, Data Preprocessing, Model Training

Soft Skills: Collaboration, Communication, Leadership under Pressure, Agile Project Management, Public Speaking

ACHIEVEMENTS

- Technical Head, AI/ML Club – Leading student-driven AI/ML projects and initiatives.
- Completed McKinsey Forward Program – Enhanced strategic thinking, problem-solving, and communication skills for real-world business challenges. Certificate Badge.
- Completed Accenture North America Data Analytics & Visualization Job Simulation on Forage – analyzed datasets and presented insights as a Data Analyst. Certificate.
