SUMMARY

Software engineering student focused on building scalable AI-driven systems and real-time applications. Experienced in developing multi-agent architectures, full-stack platforms, and production-grade systems, while collaborating across projects and applying analytical thinking to real-world challenges.

EDUCATION

Jaypee Institute of Information Technology

Noida, Uttar Pradesh

Bachelor of Technology, Computer Science and Engineering | CGPA: 7.69 /10

July 2027

PROJECTS

ChatterlyAI - Real-Time Multi-Agent AI Collaboration Platform (Python + GenAI) - <https://chatterlyai.vercel.app/>
Full-Stack / AI | Python, FastAPI, Next.js, WebSockets

- Developed and deployed a scalable full-stack architecture with a Next.js frontend and decoupled Python services on Vercel and Render, implementing OAuth authentication and maintaining stable performance while coordinating multiple backend services.
- Built a real-time collaborative AI chat system using WebSockets with shared context, live message synchronization, and streaming responses, ensuring low-latency communication and consistent message edit and delete behavior during concurrent usage.
- Designed a multi-agent AI platform's Agentic Backend using FastAPI and CrewAI to coordinate specialized agents for reasoning, coding, and writing, onboarding 50+ users in the first week with strong positive feedback from freelancers and developers.

Jaypee Learning Hub - Academic Resource Management Platform (Full-Stack) - <https://jaypeelearninghub.great-site.net>
Web Development

- Built and scaled an academic platform serving 1000+ active users and managing 1200+ resources.
- Architected the entire data model and backend logic independently, later refactoring database schemas and optimizing SQL queries to improve load times, data consistency, and overall system responsiveness.
- Iteratively improved performance and usability through frontend and backend updates, strengthening fundamentals in raw JavaScript, CSS, and backend data handling without reliance on frameworks.

WORK EXPERIENCE

Style My Space (AI Research & Product Intern) - **Remote**

Jan 2026- March 2026

- Engineered a full-stack AI evaluation platform (Next.js, MongoDB, Cloudflare R2) enabling multi-model image generation, structured comparison, and rating workflows, improving organization and traceability of prompt-result mappings.
- Devised prompt pipelines and executed large-scale multi-model experimentation across diverse prompts, enabling data-driven model selection and improving output consistency across use cases.
- Established idempotent image handling workflows with standardized naming conventions, reducing duplication and ensuring reliable storage, retrieval, and version control of generated assets.
- Optimized a comparison dashboard with client-side pagination and viewport-based lazy loading, significantly improving rendering performance and enabling smooth interaction across 1000+ generated outputs.
- Integrated client-side generation and prompting interfaces supporting iterative design workflows, reducing friction in testing multiple prompt variations and improving evaluation efficiency.

DRID Internship (Project Intern) - <https://github.com/SwayamGupta12345/drid-project-in-pygame>

Remote

E-Sports and Stress Management for Differently-Abled People

June 2024

- Developed a Python-based educational game for stress management targeting differently-abled users, integrating accessibility-focused UI features (high contrast, simplified controls, readable layouts).
- Collaborated with Prof. Manish Kumar Thakur (Associate HOD) and Dr. Suma Dawn to iteratively test, debug, and optimize application performance and refine game mechanics.

SKILLS

Programming Languages: Python, C/C++, JavaScript, PHP

Web & Backend Technologies: HTML, CSS, Node.js, React, Express.js, MongoDB, MySQL, Next.js

Tools and Platforms: Git, GitHub, Docker, DockerHub, XAMPP, CrewAI, Ollama, Hugging Face

Machine Learning & AI: NumPy, Pandas, Scikit-learn, Matplotlib, Data Preprocessing, Model Training

Soft Skills: Collaboration, Communication, Leadership under Pressure, Agile Project Management, Public Speaking

ACHIEVEMENTS

- Completed AWS Cloud Practitioner Essentials – Learned Cloud Fundamentals and AWS services. [Certificate](#)
- Completed McKinsey Forward Program – Enhanced strategic thinking, problem-solving, communication. [Certificate Badge](#).
- Technical Head, AI/ML Club – Leading student-driven AI/ML projects and initiatives.
